Mr. Powell -

Belated "Happy Birthday, Seasons Greetings & Happy New Year". It was indeed fantastic hearing from you like you can't imagine & in answer to your question yes, women my age (21-25 yrs. old) still celebrate Xmas - I'm just entering my prime (smile).

Life at the Brothers is slightly different. I'm sandwiched between Kathy & Greg Trojan (to my right) & Susan Jucker (to my left) & if I never felt claustrophobic before, God knows I do now but of course I continue to do my cruising at least 4 times a day - at a minimum of 20 minute intervals so I'm able to keep my phobia under control (smile).

Do take care & keep in touch.  
 (Give my love to Oz) Fondly Always

Nancy is one of the truly extraordinary beings on this planet - - magnificent sense of humor; bouyant/sunny personality; a great lover and a very gregarious individual at the same time; a wonderful conversation-alist. She and I worked together at Solomon Brothers.

I did work with some wonderful people at SBL: Nancy and Kathy Trojan are two of the best.

→ Ozymandias - - the mythical cat that I invented that lived under my desk at Solomon Brothers. We laughed endlessly about Oz.

In the late afternoon I typed a letter to the Editor and took it down to the News - - it is about my recent "quere" with the United States Postal Service and will, in all probability, be published in next Wednesday's News.
